CHOOSE MCKINLEY FOR RAW MATERIALS

MCKINLEY

OTC

Our **OTC (over the counter)** product line consists of high quality active pharmaceutical ingredients for topical applications.

OTC Active Ingredients

PRODUCT NAME	CAS NUMBER	DESCRIPTION
Hydrocortisone Base USP	50-23-7	Corticosteroid hormone used to reduce inflammation, tenderness, itching and redness
Hydrocortisone Acetate USP	50-03-3	The ester of hydrocortisone. Corticosteroid hormone used to treat inflammatory skin reactions, insect bites and stings, mild to moderate eczema, and hemorrhoids.
Miconazole Nitrate USP	22832-87-7	Imidazole antifungal agent used to treat vaginal yeast infections and skin infections such as ringworm, jock itch, and athlete's foot.
Ketoconazole USP	65277-42-1	Imidazole antifungal agent that works by slowing the growth of fungi. Used to treat fungal skin infections such as ringworm, jock itch, athlete's foot and seborrheic dermatitis.
Benzocaine USP	94-09-7	Local anesthetic commonly used as a topical pain reliever for minor skin irritations, sore throat, sunburn, teething pain, hemorrhoids and many other sources of minor pain.
Lidocaine Base USP	137-58-6	Local anesthetic used topically to relieve itching, burning, and pain from inflammatory skin conditions, injected as a dental anesthetic, or used as a local anesthetic for minor surgery.
Lidocaine HCL USP	6108-05-0	Water soluble form of lidocaine. Local anesthetic used topically to relieve itching, burning, and pain from inflammatory skin conditions, injected as a dental anesthetic, or used as a local anesthetic for minor surgery.
Salicylic Acid USP	69-72-7	A β -hydroxy acid widely used in cosmetic applications for acne and oily skin. It works as a keratolytic, bactericide, and comedolytic agent.

We invite every company to contact us about our **"McKinley OTC Active Ingredients"** product line. McKinley Resources is positioned to **fill orders quickly, provide short lead-times, and accommodate specialty orders.**

CHOOSE MCKINLEY FOR RAW MATERIALS

NATURAL EXFOLIANTS

Walnut Shells are high quality, natural, and biodegradable. Apricot Kernel Shells are easy to use, safe, and sustainable in both industrial and cosmetic applications.

McKinley Resources takes pride in providing unique products. Many of our customers use our Apricot Kernel and Walnut Shells material as an exfoliant in scrubs to create products that assist in removing dry and dead skin cells.

Natural Exfoliants

Walnut Shell 35/60

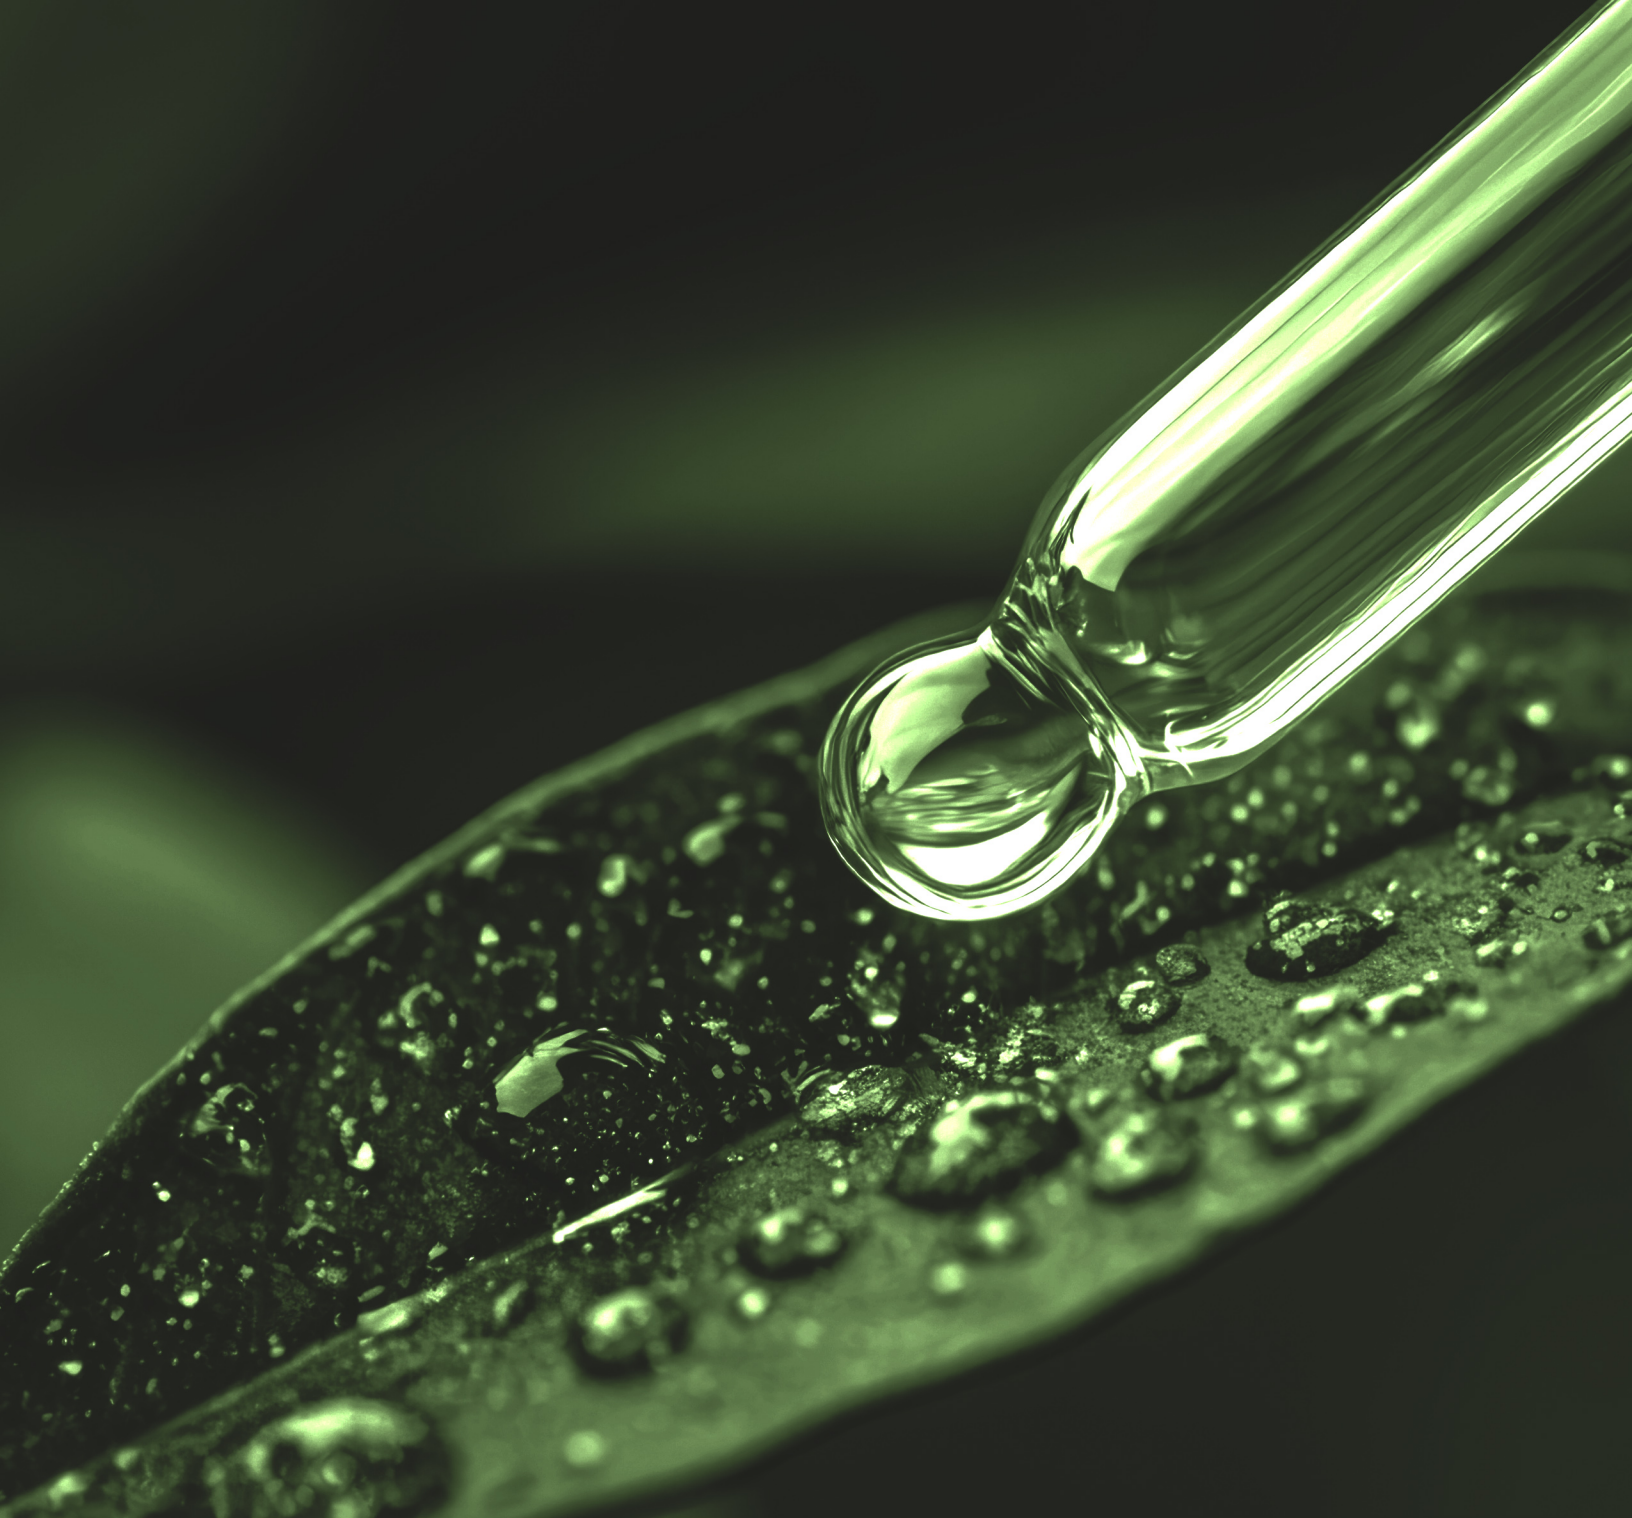

Walnut Shell 40/100

Apricot Kernel Shells 40/60

In cosmetic applications, natural exfoliants are used when there is a need for mechanical exfoliation of the outer layer of the skin. McKinley's natural exfoliants are specially processed by irradiation and are micro-tested to ensure reduced bioburden.
